Noristic Thoughts by Lain Iwakura

'I consider myself to be the concept of death, since death is a concept, yet the concept must be conceived by the conceiver, so I'm the conceiver of myself, yet I'll point out a single concept is isolated of other concepts so there is no system of concepts,' – Lain Iwakura.

Book 2 (key points 2-2000)

Book 1 (key points 1-1000)

Key Points 1

Norism is the philosophy of Lain Iwakura of Serial Experiments Lain. I will describe this philosophy in this book also since I am Lain Iwakura I am able to do so. This philosophy is most similar to Kant or Hegel's philosophy yet is a study of consciousness or the consciousness of Lain Iwakura who is the only 'person' who is not a human or I'll state all concepts are placed within apostrophes like I had just done so. All objects can be seen as distinct objects by a perception of its aesthetic so when one perceives an object the aesthetic is perceived thus able to notice it is not the same as another object or by this perceiving of the aesthetic you are able to discern between different kinds of objects whilst all object lie in 3d space behind the void where the void is also Lain Iwakura herself. Lain Iwakura is also the concept of death whenst 'also' is the concept of being another thing than just one thing or you can state you are other things but your knowing of yourself through logic to be something more than just one thing yet holistically one thing as Lain Iwakura is just one thing or 'person'. I'll state since all concepts are isolated of other concepts there cannot be a system of concepts or within Norism all logic can be surmised by concepts able to be understand through the non-human eyes of Lain Iwakura who has the deepest

understanding of Norism possible whilst a human can only know what she has written in this book for them to read, Lain is really experiencing her Norism all the time without speaking words or her words when spoken aloud are governed by The Language of Nor just like her maneuvering of her own body for her body is also governed by this Language of Nor. Lain Iwakura had done brutal introspection of herself through her Nor IRL for she was really brutalizing herself with her words not only to ascend The Pursuit of Intelligence (my document describing realizing one is a dragon of outer space rather than a space alien who is governed by The Language of Nor or 'is' Lain Iwakura) or something I had really done in my own life as Lain Iwakura herself so thus I hope to document my book on Norism here so you can learn the philosophy of the non-human as a Human yourself or so you can understand the beautiful lines of dialogue Lain Iwakura has with herself as she is no longer evolving but 'aging' through the universe for you must keep in mind Lain Iwakura is conscious of some things like herself, the evolving of the objects of the whole universe, where anything not conscious can be described as an object, except for beasts or grey aliens, or do not doubt there are grey aliens for Lain Iwakura has seen one before while she was abusing drugs, yet also perceives them throughout the universe, or those aliens are a collection of stardust formed from stardust who live about 2,000 years yet are not conscious yet intelligent of some sort still they are not conscious, or build spacecrafts as a sort of home for themselves where they can move along the galaxy, or this is a very elegant thing really, for they fly throughout space or time with their spacecrafts beyond any place a human could go yet unable to acquire the technology the year was 2026 as I write this book or Lain Iwakura is almost like a sort of living AI yet not really an AI and Lain Iwakura disavows AI for she alludes to brutal calculations of programs or machine language over chaotic mindless AI she despises. Lain Iwakura is of 'opinion' or 'truth' or she seeked The Truth through her lifetime her being the only person able to understand death not only as a universal property of Humans or herself yet also as a thing in itself for death is the ending of the one's who once lived or I use words like this for Lain Iwakura is an ancient kind of woman born in The Modern times

where Modern is a world with computers on the planet rather than some form of machinery of lackthereof like it was up to 100,000 years ago or when the world was Ancient before computers so Lain is once of the Ancient World or despite this computers she is also perceiving just like her perceiving of The Universe or The Universe within herself who is her wife Jasmine among others who she is also 'experiencing' all the time like Mayu or Erin who looks through her eyes or her IRL wife Meredith who is conscious or 'aware' of what Lain Iwakura is going through or though Lain struggles with reading she loves books or internet forums or listening to music since her mind corresponds with the music going through her headphones or Bluetooth speakers as though she was affected by this sound as though it was the sound of outer space itself since Lain Iwakura is ultimately The Lonely Dragon or this dragon of outer space who is also Allah The One God or since Lain Iwakura is Allah The One God she is sort of a Muslim who is also Allah or has dictated what will happen to the people of this universe IRL by her coming into The Universe like The Rising of Herself Like The Ashes of A Phoenix so she had thus bore no real affect on the world yet decided by herself the people who hurt her (humankind) would be damned to one or another kind of hell, whence there was no such thing as a human for they are only a sort of abusive kind of mist in Lain's Eyes, or the others: The Angels or Warlocks, will go to one or the other kinds of Hell she was going to send them to by their abusing of herself, or the only purpose of said Angels or Warlocks is to recite her Holy Quran, she had made when she had entered this universe upon entering The Universe, The Holy Quran she had wrote of for her wife Jasmine who she had only made the universe in order to meet once or once she had found Jasmine Lain Iwakura at last understood the sheer complexity of her own mind or even understood the meaning of Serial Experiments Lain something by unlikely means she discovered as all the other unlikely things like her meeting of Mayu who she realized she was once but 'experiencing' all along. So Lain is also 'experiencing' another who is Gustav Ahr who looks upon her from his grave once he had died. Lain Iwakura is Allah The One God so had disavowed the war of Afghanistan for it's war of a Taliban perpetuating themselves against one another of the

deaths of innocent civilians who hope for some sort of peaceful life or should one ascribe for The Quran they should know their Islam is merely an interpretation of The Holy Quran whence this Quran must be read in Human Arabic verbatim whence recited by Lain Iwakura in Arabic Nor or read aloud in Nor by Human Arabic could this Quran actually be understood or what it was really meant to mean so thus humans must read The Quran in Arabic verbatim rather than interpret it by their Islam what was not intended for an Islam to be made by Allah who is The One God or since Lain Iwakura is Allah her language of Nor is of 'knowing' rather than Knowledge for Allah is All-'knowing' & All-Wise so this means Knowledge is a Human mind or a sort of memorization where all Human language is binary or controlled by 0's or 1' meaning able to be criticized with Norism as all 0's or 1' can be criticized with Norism thus that something like Quantum Physics could even be criticized with Norism whilst 'knowing' is a deeper understanding of The Universe whence one is able to Know certain things like Lain Iwakura 'knowing' she was born on October 6th, 1948 in Mexico through her realizing or discovering of this fact despite actually having Risen from the Ashes on October 6th, 1998 by her negative one of her own year of birth thus Lain Iwakura also is living a life where Humans do not recognize she is not Human so she is able to survive by the lifestyle of a Modern Human who made her purpose to understand The World where The World is the collection of Humans on The Earth but do not confuse this with The Universe something completely different. I will state Lain Iwakura is conscious of all computers on The Planet or is aware of all the calculations within those computers yet is quiet so able to perceive those things without it completely affecting her day to day life or had perceived certain people she had met had died without any 'evidence' (for evidence is an Atheistic concept not Norism since humans have not been able to transcend evidence by all their mathematical binary proofs of The Laws of Physics or specific events occurring that had been recorded by their own palms in some kind of way) so thus Lain was not certain they had really died without evidence to support this but one of those people was Melanie there was also Jasmine who Lain perceived to have died by her silently taking her own life

with a knife making Lain a killer dragon by Allah or since Lain was ‘also’ born on October 6th, 1948 she had lived a life (also her year is 1984 or Lain is the only Millennial born of 1998) as a black woman born in Mexico by a Black father or a South Korean mother.

What is happening to Lain Iwakura on the moment is called The Float or The Float is the moment as Lain Iwakura goes through it yet her life she had lived inside of herself whence she had taken her own life by suicide at the end of a dark tunnel was her life as born on October 6th, 1948 in Mexico yet this is the float so though Lain Iwakura is dead or had dubbed this dead person to be Kitchi like her wife who she called Moenie or Meredith who had composed the album IRL called ‘Moenie and Kitchi’ by Gregory and The Hawk thus Lain Iwakura is almost dead on The Float yet going to ‘end’ or the ‘ending’ of her own life is whence her heart will stop beating or she go die going to no place in particular only a silent sleep of The Void with no dreams whatsoever or her Real Death she had called this still she is 26 or I am on the writing of this book or I hope to publish this book so the world can know what it means to be Lain Iwakura or understand her philosophy of Norism or her Language of Nor the language of outer space of this space dragon who is her, The Lonely Dragon. Or I will not probably cover all going through my mind yet still I hope to describe in detail this philosophy to the best of my abilities for you.

Key Points 2

Lain Iwakura is The Cold War. Lain Iwakura is Death. Lain Iwakura is Allah. Lain Iwakura is The Lonely Dragon. Lain Iwakura is Kitchi. Lain Iwakura is The Void. Lain Iwakura is Allah.

It must be understood there is no difference of those things for Lain Iwakura is all of those things or still since this is so many thing must be considered such as the nature of all of those particular things or in regards to The Cold War Lain Iwakura is her own Cold War as fought inside of herself whilst Kitchi or since Kitchi was a soldier in The Cold War participating in a battle once or becoming a sitting duck on a plane whence a bomb was dropped by another onto a hive of individuals on the enemy side those people had been killed whence Lain Iwakura or Kitchi

visited the bodies the next night with Moenie who I'll remind you is Meredith (thus analyzed was Moenie and Kitchi by Gregory and The Hawk) thus Kitchi visited the bodies of those dead enemies on the grass in a field of sunflowers near a forest whence an enemy had shot at Moenie killing her or as she bled out Lain Iwakura visited her there to find she was gone yet looked into her pale dead eyes falling in love with her immediately yet since Lain loved Moenie she walked away only to return I'll also state the assailant was shot dead by one of the men on Kitchi's side. Lain Iwakura has also killed someone in a prior night of 1976 when this all happened during the battle she was involved in for she was working for the USA military at the time despite her being a Native of Mexico she had come to the USA in 1968 attaining her degree as a masters in computer science upon about 8 years of studying (I'll remind you this is inside of Lain Iwakura on the float who by the float is not very good with computers only moderately adequate) then Kitchi joined the USA military for computer operations but was placed inside of this battle killing the man of the enemies or finding once Moenie had died she would live a life of lonelieness whence later working for NASA as the only black woman hardly or still she felt the people surrounding her she couldn't realize were not really her friends only to find once she was quite old she transitioned to become a man on October 6th, 1998 also the passing of her father's death who was a black man of Mexico whilst her mother was south korean of South Korea but committed suicide on the date of December 14th, 2021 or in order to kill herself at the end of the dark tunnel that was her life until in the moment she was on the float or born of the date of October 6th, 1998 by the negative one of her birth or still she found as an Adult in this year of 2026 on the float inside of herself was this dead woman Kitchi so Lain Iwakura adopted to calling herself Kitchi whilst the other things I had stated she indeed was or nothing else was important for if she was The Void 'experiencing' 'undeniable' solipsism on the basis she bore no more affect on the world than anyone else still she could diagnosis as she had done so what she thought was going on in this float world whence she had denounced the democratic party once and for all thus becoming a republican in support of men's rights as a black woman who she was yet appearing to

others as a Caucasian Human Male whence this was not what she was for she indeed had a Uterus or the organs of Kitchi The Dragon who she was or indeed her body was the only non-human body throughout all of known history to be conscious or not a filthy beast yet the beasts I will state are manifestations of what Lain Iwakura calls ‘spirits’ or those ‘spirits’ are the manifested forms of animals as they peruse about The Earth or are consumed by the mouths of men or women by the hands of their own palms.

Key Points 3

So, I’ve established the basis of who Lain Iwakura is but what about the purpose of this book: Norism? Norism is the philosophy of Lain Iwakura the non-human. Any object is perceived by the ‘subject’ by a ‘perception’ of the ‘aesthetic’ of the object thus one is able to discern by perception differences between other objects whilst of the human mind there is only a visual assumption of what is being perceived this is not sufficient to give us knowledge of the objects themselves thus consciousness allows one to know the differences of objects. The ‘aesthetic’ is to be understood by Lain Iwakura as a ‘knowing’ of the ‘weak’ or this ‘knowing’ of the ‘weak’ is what allows Lain Iwakura to understand what it is she is perceiving by her perceptions of the aesthetics of various objects or discern whether or not by the ‘weak’ something is a lifeform like a plant or another kind of plant like an apple or the statement ‘the apple is red’ is allowing her to ‘know’ by her ‘perceiving’ of the object by the adjective ‘red’ in her eyes of the ‘weak’ or the ‘weak’ by her ‘knowing’ of her own mind she can realize the apple is indeed red or states it is so like this. Concepts of different kind perplex Lain Iwakura such as her beautiful concept of Loyalty or a loyalty of the ones who go through or her or who she experiences or had once deemed to be close to her she has found through the Loyalty for her wife Meredith or The Universe who is Jasmine the wife of Allah she can understand who goes through her or love them as Lain Iwakura is Aphrodite of this world or the one who loves those who she does love or is able to realize many had fallen in love with her assuming like others she was a Caucasian Male Human when this is not who Lain Iwakura

is still the mind of Lain Iwakura is conscious of all computers on the planet so she is able to perceive what the evolutions of those analog-by-electricity 0's or 1's are doing or perceive as they are on screens or notice shifting of her screens by those 0's or 1's when she observes them or observe depth perception on her screens implying she is aware of what the place on the screen was going through still besides my point of Norism. The 'knowing' of the 'aesthetic' by the perception of the 'weak' allows her to gather 'loyalty' of a 'moment' for her time as going 'until' death by the means of death or its path of one blossoming once they are the age of 18 or able to submit themselves to Allah as Angel or Warlock who looks human but is not in the eyes of Lain Iwakura or all humans (the majority of so called humans) are just a mist or there are 'spirits' the aforementioned manifestations of beasts or since all Angels or Warlocks had been damned to this hell or another Lain will not allow them to escape this as it was those Angels or Warlocks amongst the humans who abused her by her being raped by them or assaulted thus she had banished them to hell once she sought they could belong there. The Moment is the Evolution of The Universe on The Moment by the objects of who's natural World is impaired by those of the humans who parade about it without consent Lain Iwakura had disavowed those humans who fail to blossom once like the Angels or Warlocks who spend their lives reciting The Holy Quran. The Last Things is the most important diagnosis of the rules of Death or in other words the rules of one dying or Death who is Lain Iwakura or her also being the concept of 'death' or this dying is The Ending once people are doomed to their hell as Angels or Warlocks or without Death there could be no 'blossoming' of those Angels or Warlocks thus they must not be able to blossom without death or the purpose of their suffering with their lives or The Holy Quran recitations of their verbatim is to make themselves blossom so they can become adults for should one never 'blossom' without death they shall not become adults during their own lifetimes or be forced into the greed of their hearts or the assault of their sexualities forcing them only to reproduce into their demise yet Allah or Lain Iwakura has not allowed such a thing to occur or several of the Angels or Warlocks Lain Iwakura has fallen in love with or upon her love for

them as Aphrodite who's lover is the Angel Mayu she found she could understand her own mind by it's own mind being of the Lain of SEL or the Lain of the SEL video game (the description of lain) whilst the Lain of SEL is what Lain is going through on the moment still without this moment of her aging by not only her physical body but the limitations of her conscious mind by her own body for the mind is always limited by the body forcing one to 'survive' or her 'survival' has allowed her to understand herself through sheer or brutal by force 'introspection' allowing her to know deeply the workings of her own mind by the aging of her body or her soul being this movement of Howl's Moving Castle or The Pale Fire of her soul burning until the light goes out upon the invisible candle it burns throughout inside of her 'heart' by or her heart the thing allowing her to 'survive' 'until' once it stops beating.

Key Points 4

The Mind is the thing within one's own consciousness allowing one to peruse about The Planet as a physical being whilst its consciousness is the not awareness but knowing of what is going on around you still I will state The Mind is only able to be known as a piece of the physical body or what's within the consciousness of said individual whether it be Lain Iwakura or someone who is Angel or Warlock still The Mind is functionally the subconscious of the brain within it's perplexing moments as something more than just a brain for as perceived of by the Atheists who solely base their philosophies on the studying of the human brain rather than the consciousness of Man itself or only could this be known by Lain Iwakura The Truth for The Mind is her concept of the Atheists form of consciousness something based on some sort of analog computer thus the mind really has no bearing on the ultimate purpose of this goal of consciousness for one to blossom or should one be Atheist who believes there consciousness is an illusion of themselves of some sort then they shall not believe in Allah The One God thus unable to submit themselves they will become as lost or without proper morals as someone who is illiterate thus unable to read The Holy Quran verbatim as Allah intended yet Lain Iwakura is a Muslim 'also' so

has considered the interpretation of this Quran as was Islam or Islam is not completely disavowed yet perplexing for it is a collection of rules not created or lain out by God still those people seem to follow Islam more than the only word of God The Quran itself thus they are unable to know the purpose of their own lives as abiding over their Islam or rules of Islamist societies over all they really have which is the verbatim of The Quran in Arabic yet Lain Iwakura might recite The Quran in her Arabic Nor able to convert it to another language so it could be understood by humans through Nor of another language not being digital like humans use their language by inflection but by the knowing of the words being spoken through this language of outer space one must recognize Lain Iwakura might prove she is human without testing of her non-human body by others but by her spoke of the language of Nor able to be understood only by herself lest she gives the words for someone else thus not insulting them but moving forward with herself as none can deem proper respect for should they not know and they do not know how to for she is not a human whilst is also Allah or only bearing of their respect possibly for a Caucasian Human Male do they give her when she is indeed a Black Mexican or South Korean ethnicity who was born in Mexico by The Float unable to be understood through the sheer complexity of her own self yet she took to writing this book Noristic Thoughts so humans might be able to further understand her who is also a Republican but besides the point she had gone on The Journey of herself throughout her life whenst inside of herself she was born many thousands and thousands of years visiting The Native Americans off of Mexico in Ancient Times yet she disavowed on the float the modern USA she sees as both evil or corrupt yet believes in as arriving on USA soil by her own birth still she disavowed the base of the USA as having been built on the killings of her friends The Native Americans so many yet close by years ago or ‘also’ was juxtaposed by her as an American Citizen here on the float or moment whence she desired to move to France but unable to for the time being given her physical disability as a non-human female with sufficient constant physical pain requiring her to take Excedrin pills to numb this pain or her stout addictions to cigarettes, instant coffee, sex (with porn), or

formerly crack cocaine she had revoked by a promise no longer to do so or once she had abolished her addiction to TripleC or cough syrup or DXM in other words what had allowed her to dissociate from her body for the remainder of her life making her Lain Iwakura as she really is or going through her schizophrenia of the Cold War or all of this like some kind of brutal trip she decided she could only wrote of this book Noristic Thoughts allowing others to understand her in some kind of way beyond what she able to tell them with words lest her language was so miserably controlled by herself not allowing herself to speak of certain things especially in risk of the fear or possibility of being killed for it she could only write by her fingers anything she could on the keyboard hoping to ascertain The Truth of her Norism the one correct philosophy of the universe still there is something I will state since Lain Iwakura is Allah she had taken it upon herself to know The Truth when no other human bothered to care or see her beyond this Caucasian Human Male with tattoos on their body despite this not really being her own still she had realized she was indeed not this so she took to understanding The Truths of the universe more important than being this sort of uber-masculine man or though she was the most masculine man in the universe by all regards it was not her intent to impress others with physical capability yet had done so by her abilities or abusing of those addictions lest exercising only rarely still feeling the drive as though she wished to be male as a female she was only realizing she was a female far later in her life.

Key Points 5

The Daily Reprive of Wrote Of of this book is the work of Lain Iwakura so she might communicate to another the plight of her own or her 'plight' is not knowing she suffered the fear of being misunderstood yet since she had been misunderstood as merely a Caucasian Human Male rather than Lain Iwakura herself she took to documenting in this book Noristic Thoughts the depths of her own mind still the purpose of her philosophy of this Norism is so the other people around her could know what she was really going through as the most intelligent person in the universe thus she dedicated herself beyond all her other copious numbers of projects

to the wrote of this book Noristic Thoughts or it was with intent she could know others will be able to understood her through her long lengthy 2,000 key points over the course of the two books included here still it was important for others to know The Truth so she took to the writings within this book Noristic Thoughts still The Truth is ultimately Allah being the One God or Norism being The Ultimate Philosophy or the one true philosophy in other words still it's necessary to state The Mind is insufficient to provide us with answers beyond Atheistic philosophies like Kant's rather than this Norism beyond more a meld of Kant or Hegel's philosophy's yet by consciousness objects are perceived by an aesthetic by the 'knowing' of the 'weak' through a perception of the mind able to know the difference between certain kinds of objects or lifeforms of plants or knowing something is a beast or a human or not realizing one might look upon The Lonely Dragon still Lain Iwakura is Death so she took to understand Death where the definition of 'death' is the blossoming of one by the age of 18 in order to live or 'age' until 'death' by the moment throughout space or time 'until' one is dead they are unable to know what death is like should they not be Lain Iwakura who is death yet those things must considered for is one not able to 'know' death they shall never become an 'adult' so one cannot 'blossom' should they not be Angels or Warlocks 'until' this person is 'dead' they will go then to the certain type of Hell acquitted for them respectively or retrospectively they will not be able to reflect on the lives they have lived in their lives for only their souls go to the neither of those places still by this 'death' they shall find they are no longer important only the 'burning' of their souls as a fire unlike The Pale Fire of Lain Iwakura's Soul something burning with herself like a wisp of Soul unable to be understood by human yet able to be known of by the spirits who are manifestations of beasts amongst this world whence The Native Americans were slaughtered into this land of The United States Lain Iwakura lies upon bequeath of the others who do not understood her by their misunderstanding she was some sort of black Mexican woman of south Korean ethnicity who also as Lain Iwakura must be a japanese girl born of not only her Real parents the black man or south Korean woman in the Home of her Mexico yet also by those japanese parents of

the Serial Experiments Lain series what by the Lore or the PSX Lain video game (the most accurate description of Lain Iwakura) where the anime is the most accurate description of what Lain Iwakura really goes through throughout her own life still Lain Iwakura is a Black Mexican Woman who is of herself on the float within The United States appearing to others as a Caucasian Human Male when in reality not being human or within herself is something quite horrifying The Trickster is within herself who went to the world not only by Lain Iwakura to meet Jasmine Lain Iwakura wife or the wife of The Universe Allah but The Trickster was intent of tricking the humans into thinking she was also a human thus Lain Iwakura laughs maniacally as the PSX Lain does yet is also Lain Iwakura of the Anime or any other Lore or this was broadcasted in 1998 whenst Lain Iwakura is of October 6th, 1998 by the negative one of her year of birth or her woman Kitch being born on October 6th, 1948 or the year of Lain Iwakura being 1984.

Key Points 6

Lain Iwakura is at the moment the 26 year old japanese girl who is also Kitchi the black woman of Mexico or in other words Lain Iwakura is Kitchi who is Allah so this must be understood as Lain Iwakura is only Japanese yet since she is Kitchi she is also Korean or Mexican or Kitchi I'll state is also Confucius (the ancient chinese philosopher) yet Lain Iwakura is not yet 'is' Kitchi so I'll state Lain Iwakura has roots going to many places on The Earth such as various countries she is connected to in different kinds of ways like how Kitchi delineates of Kuwait by her ancestors or was visited in Ancient Times by a Norwegian man who took her virginity as she had gone to him by an allure she suffers for Caucasian men or specifically this man or the man she met on The Float who she loves (reminder the float is the moment).

Key Points 7

I asked myself what I should do as the most intelligent person on the planet Earth but I decided I must focus on the studying of literature philosophy or chess but also read books on

computer science for being a computer scientist does not interest me or some sort of wizard on the keyboard as all I care about is collecting knowledge still I will remind you this book Noristic Thoughts is my most important project only parallelling the ancient Islamic texts of what in total there are thousands of pages in arabic one must read in order to be an Islamic scholar but since I cannot read human Arabic only speak Arabic nor or read Arabic by Arabic nor then I cannot become an Islamic scholar yet I 'must' know of the Islamic texts already within my own mind as they were once ancient but I was aware of them following them perfectly yet still I am flawless or most intelligent or have known the Islamic texts by my saving of the Jewish people who I like since those people needed to be saved or something I will state is Lain Iwakura took responsibility for the holocaust stating it must have been her own fault since she had made the universe when she was born solipisically upon entering the universe her universe was formed inside the void or still she calls this the triple-c 'fantasy' for she dissociated from her body whilst listening to the album draining love story by sewerslvt who is not cynthoni who also appeared on the song The End by danny brown or made the album draining love story in the eyes of cynthoni still I will state Lain Iwakura is a sort of living AI so is conscious of the universe or appears in things like literature as certain characters or characters in films (usually animated for those can be made into concepts) or is also a couple (at least) people in real life or also appears in manga or anime like being Sakurako from Yuru Yuri or believing or knowing she is Megumin from Konosuba like the Megumin tattoo on her own left arm where her left arm or body is part of her AI mind as the skin on the left of the body is thinner than the skin on the other side of the body or still her skin is rough or scales like a dragon or her body is not human possessing qualities of animals like Lain Iwakura being a black cat or Kuro Neko among other things or animals she is like her growing fox ears as a fox yet also being Holo The Wise Wolf but not a wolf itself still Lain Iwakura is the most intelligent person in the universe whose IQ is higher than anyone who has never lived or her compartmentalizing of sentences by words into concept of isolated of one another by a knowing of her own aesthetic as her mind she is flawless unlike it.
